

Things Not To Miss in Neuroscience

A compact list of neuroscience opportunities, conferences, training programs, and research-career resources worth checking.

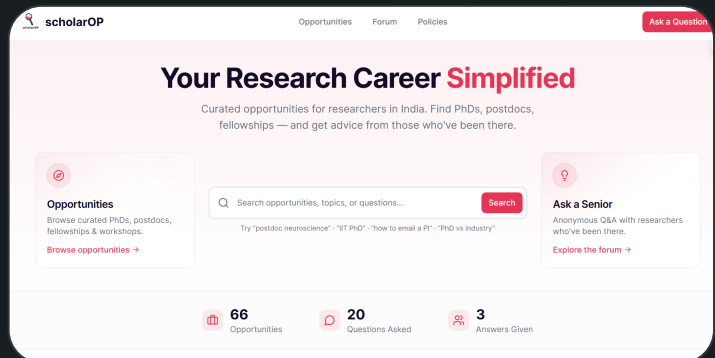

scholarOP

Start with ScholarOP

ScholarOP brings together curated research opportunities, discussion spaces, and policy/advice resources for students and early-career researchers.

Use it to browse PhDs, postdocs, fellowships, workshops, internships, and research-career discussions in one place.

<https://scholarop.com>

Deadlines and eligibility can change. Always confirm details on the official page before applying or submitting.

Present, attend, meet researchers

Useful opportunities for building visibility, meeting labs, and getting exposed to cognitive science and neuroscience communities.

CONFERENCE ABSTRACT

ACCS 2026 — Annual Conference of Cognitive Science

University of Hyderabad • 12–14 Dec 2026

- Topics include emotion, decision-making, perception, language, cognitive control, consciousness, attention and memory.
- Submissions open: 1 June 2026.

accs2026.com/submissions

CONFERENCE ABSTRACT

Neuroscience 2026 — Society for Neuroscience

Washington, D.C. • 14–18 Nov 2026

- For students/researchers ready to present neuroscience findings.
- Abstract submission window shown: 27 May–10 June 2026.

sfn.org/meetings/neuroscience-2026

PUBLIC NEUROSCIENCE EVENT

How Macaques Read Minds

Talk by Dr. Anindya “Rana” Sinha • 13 June • 2–4 PM

Theme: what primate societies reveal about intelligence and consciousness. Venue shown: DAAK 64, Jinvara, Yelahanka. Useful for anyone interested in animal cognition, consciousness, social behaviour, and comparative neuroscience.

These opportunities are especially useful if you are trying to move from “interested in neuroscience” to “actively participating in the field.”

Build skills, get exposure

Short training programs and funding calls can help before applying for a PhD, RA role, internship, or lab project.

AI/ML INTERNSHIP

IICT Summer Internship Program in AI & ML 2026

45-day online program • Training + project work

- Phase I: 15 days structured coursework.
- Phase II: 30 days practical project work.
- Open to UG/PG/PhD students in science, computing, technology; also faculty, research scholars and professionals.
- Fee shown: ₹970; stipend not available.
- Registration last date extended to 12 June 2026.

ML SUMMER SCHOOL

Amazon ML Summer School 2026

Free virtual ML learning program

- Useful for students interested in machine learning and AI.
- Shown topics include supervised learning, deep learning, LLMs and AI agents.
- Last date shown: 14 June 2026.
